Dr. Venkita S. Suresh

Group Medical Director, Kauvery Hospitals, India

Editor-in-Chief of Kauverian Medical Journal

Email: gmd@kauveryhealthcare.com

Dear colleagues,

The KMJ's dream is to see our authors confidently migrating to presenting their body of work than opting to stick to the comfort zone of the "single case report".

We open with the brilliant work of Dr. Vinod Gunasekaran on BMT in children at Trichy with Thalassemia Major, a work all of us can be proud of.

After six years of publishing modest "single case reports" in poisoning, we take a giant leap forward with the analysis by A. Johnson, Group level Clinical Pharmacist at Trichy, on '140 patients admitted to Trichy Cantonment Hospital with poisoning'.

Samyuktha, Group level Clinical Pharmacist at Trichy, scores a "hat trick" in this issue with three publications!

Two of them are major studies on data from Heart City: 'CAD in Young Women' and 'CABG in Young Women.'

Dr. Archana Viswanathan, DNB Resident at Trichy, presents a novel study on "CV Health literacy and Emergency preparedness in students".

We next go on to our "Specialist Pages".

Dr. Femela Muniraj from Radial Road who launched the "Laboratory Pages" publishes her farewell paper- "Incidental tumour on the chest of a child".

Selva Maheswari from Dr. Deep Chand's team at Alwarpet posts at our EPS Page their report on 'Ablation of Intracardiac, Echo guided, Papillary muscle origin PVC/ VT'.

On the Radiology pages, Dr. Meenakshi Paramasivan posts several reports: 'CT Brain spotters and 'Time as a healer of a dramatic disease diagnosed by Radiology'.

Dr. Shriram Varadarajan adds his own contribution - a Neuroradiology nugget- on 'Contrasting FLAIR mechanisms in Meningitis'.

Before we go on to several brilliant case reports, we announce a breakthrough!

It has taken us SIX years to publish the FIRST thesis from our MEM Emergency Medicine PG program at Trichy!

At last, we present Dr. A. Ramya's thesis on " Comparison between FOUR score and GCS in assessing patients with TBI".

Finally, the case reports!

Dr .TG Prabhakar from Nellai reports on ' Anchor sutures in Orthopedics.'

Dr.RM Subbiah from Trichy reports on " Chronic Asymptomatic Thrombocytopenia'.

Dr. Harish MM from Marathahalli reports on Post-Partum Intracranial Haemorrhage.

We next have a barrage of papers from Radial Road!

Dr. Vishnusankar from Radial Road reports on 'Atypical Sarcoidosis'.

Dr. Sindu Sivanandan from Radial Road reports on 'Neonatal Meconium Peritonitis.'

Dr. Thendral from Radial Road reports on 'Accessory and Cavitated Uterine Mass.'

Dr. Sridhar. K, also from RR, reports on 'Correction Surgery on Scoliosis.'

Three industrious Clinical Pharmacists from Trichy present very incisive, and highly educative, case reports:

Madhumitha reports on ' Enhancing patient care through personalized patient connections".

Samyuktha completes her ' hat trick' with 'Autoimmune CVT in a young woman'.

Shirlin M. S. strikes a home run with " Endocarditis at Heart City ".

Dr. Kiran Araballi from ECB rings the curtain down with 'Pediatric Necrotizing Pneumonia".

Writing about our work, at the end of the day, and publishing it, is not an option but a responsibility; not an indulgence but a commitment.

That is how we make our little contribution to the advancement of medical sciences.

Do write about your work and share it through the KMJ

Best regards
