## Editorial

**Dr. Venkita S. Suresh**

Group Medical Director, Kauvery Hospitals, India

Editor-in-Chief of Kauverian Medical Journal

Email: [gmd@kauveryhealthcare.com](mailto:gmd@kauveryhealthcare.com)

Dear colleagues,

Dr. Manivannan launches this cerebral issue of KMJ, dated 08 Jun 26, with the transcript of his 60mts long, deeply inspirational and thoughtfully assembled thoughts that shall guide the Kauvery Postgraduates on "What kind of doctor do you want to become?"

The video of the lecture is available at our PG Library, Trichy.

Three MEGA Audits greet you next.

Suryaprabha et al reveal a major audit on the status of GDMT for Heart Failure at Heart City in 295 consecutive patients.

We are nowhere near the goal post.

Madhumitha takes the baton from her and reports on status of GDMT in 110 consecutive women with heart failure.

Are we failing those hearts?

Madhumitha bats again, from the other crease- reporting on Finerenone in Cardiovascular disease and CKD on 169 patients at 12 hospitals. Each case report that follows is unique and powerful.

Dr. Madhusuthan finally brings to KMJ their work in brain and spine surgery and debuts with "Endoscopic Spine Surgery".

Dr. Ramasubramanian does likewise with Pulmonology with his "Inhalational Burns".

For the FIRST time in KMJ" history , we attract a paper from outside Kauvery!

Dr .Santhosh Kumar from KIMS, Blr, writes on Osteonecrosis in Sickle Cell Disease.

Dr .Ummu Guldhum from Nellai reports on 'Fat Embolism Syndrome'.

Dr. Arivazhagan from Hosur highlights 'Difficult Airway Management in a patient with post burn contracture, neck' .

Dr. Debapriya Ghosh from Marathahalli introduces us to us 'SuperVasmol poisoning'.

Dr .Samuela Cian Rego reports 'New onset AFib following Ketamine analgesia'.

Dr .Jayabharathi reports on 'Negative Pressure Pulmonary Oedema.'

Dr. Aparna from Heart City reminds us about 'Kounis Syndrome- Ac MI associated with Urticaria and Angio Oedema.'

The KMJ is delighted to publish for the FIRST time unique, deeply heart- felt" Narratives" on patients.

Ovia from Trichy Nephrology tells an unforgettable story about "A language we built together", with an extra ordinary transplant recipient .

This is paired with another great narrative- from Dr. Prathibha Thangadurai, a young Nephrologist at Nellai, about the "Invisible Side of Medicine" shown to her by an young woman battling Systemic Lupus Erythematosus.

Dr. Meenakshi Paramasivan elegantly concludes the edition with her immaculate and educative MRI images.

Do read, and write for the KMJ

Best regards
